## Professional Summary

Passionate and self-motivated IT undergraduate at SLIIT with a strong interest in UI/UX design, web development, and mobile app development. Skilled in creating user-friendly interfaces and responsive websites using modern tools and frameworks. Eager to contribute to innovative projects and continuously grow as a full-stack developer and creative designer.

## Projects

- **Online Voting System ( Group Project ) - HTML, CSS, JavaScript, PHP**  
Designed and implemented CRUD operations for managing voter registration data, allowing users to create, read, update, and delete voter profiles securely.
- **Online Employee Management System ( Group Project ) - Java**  
Implemented CRUD operations for managing department details, enabling users to add, view, update, and delete departments in the Online Employment Management System
- **Baked-Tato Website ( Group Project ) - MERN Stack**  
Implemented the user management function with secure login and registration, including Google authentication as a special feature in the BakedTato system.
- **Study Break Garden (UI Design - Figma)**  
Designed a relaxing mobile UI using Figma that helps students manage study sessions through a virtual garden that grows with study progress.
- **Travel Ease Website - React**  
Developed a dynamic travel website using React with features such as destination listings, reviews, and user-friendly navigation for exploring travel packages.
- **Baskin Robbins Mobile App (Android Studio)**  
Developed a feature-rich mobile app for browsing products, placing orders, and viewing offers using Android Studio and Kotlin.
- **Personal Finance Tracker (Android Studio)**  
Built a finance tracking app to help users manage income and expenses with login, onboarding screens, and SharedPreferences for data storage.

## Academic History

### BSc (Hons) in Information Technology
